

V-ZIPS

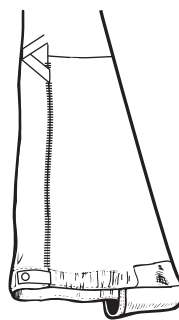

Intended to give a tight leg for lightweights.

REGULAR

This is our most functional bootie to date, and should last a long time. It is available in the standard shape which has a curve to it or the mega bootie which is straight from the knee to your toe.

BOOTIES

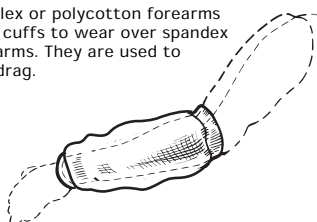

MEGA

We now offer two more bootie designs that are popular with teams. We have the XL bootie as used by the U.K. national team, and the Airspeed bootie as used by the USA national teams. The XL bootie has shock cord inside a cuff that goes under the shoe and is adjustable. This bootie requires a shoe goo type of substance to stop wear on the stitches. (not included) The Airspeed bootie is almost the same, the difference is that under the toe of the shoe there is a piece of bootie leather to remove the need for shoe goo. We also use our 1" elastic instead of shock cord on the Airspeed bootie. Both these booties are designed to be easy on, easy off.

SLIP-ONS

Suplex or polycotton forearms with cuffs to wear over spandex forearms. They are used to add drag.

SUREGRIPS

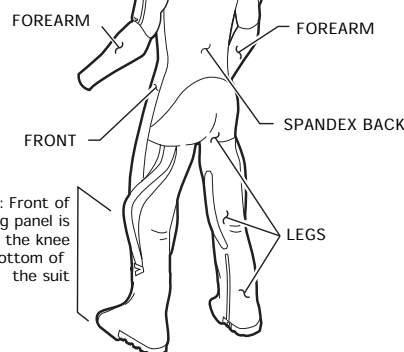

Suregrips are an industrial non-slip fabric on the back of the grip. Popular with teams.

"CONTINUOUS SWOOP CORDS"

are a one line piece of micro line (spectra) running from one thumb on the hand loop, down the sleeve, across the butt and back up the other arm. They enable you to reach out with one hand for a grip without stretching the swoop cord.

NOTE: The spandex wing option on the Pit pulls tighter when released.

MALE PIT

THE PIT SPECIAL COLOR LIST
